**RAPIDADVANCE AND TRISOURCE SOLUTIONS MEET SMALL BUSINESS
FINANCIAL NEEDS WITH BUSINESS LOAN ALTERNATIVE**

*RapidAdvance and TriSource Solutions partner to bring merchant cash advances to
business owners in need of working capital*

BETHESDA, MD, September 4, 2008—RapidAdvance, LLC, a leading provider of merchant cash advances in the US, UK and Canada, has partnered with TriSource Solutions, LLC to bring small and mid-sized business owners an alternative financial solution to a traditional business loan. TriSource Solutions, a full-service merchant processing company known for delivering a wide variety of cost effective solutions to their customers, will now assist business owners in securing the working capital needed to expand their business, purchase new inventory, purchase new POS systems, leverage a seasonal opportunity or reduce other financial obligations.

“Our partnership with TriSource Solutions will bring business owners the funding they need to maintain a healthy and successful operation,” said RapidAdvance President and COO Jeremy Brown. “We know that by working together, we’ll be able to reach more business owners with the working capital they might not be able to obtain from a bank loan. TriSource Solutions has a reputation for delivering outstanding products and service and we believe our program is a natural fit with their customers.”

“TriSource Solutions is proud to add RapidAdvance’s Merchant Cash Advance program to our suite of services that we now offer to merchants,” said Tom Dunn, President of TriSource Solutions. “RapidAdvance’s reputation for exceeding customer expectations makes us confident that our customers and sales agents will find significant value in this merchant cash advance offering.”

Different than a traditional business loan, RapidAdvance's merchant cash advance is a simple solution that purchases a fixed portion of the business owner's future credit card receivables at a discount. The business owner receives a fixed dollar amount now for a small fixed percentage of their future credit card transactions.

Repayment of the merchant cash advance is simple. RapidAdvance gets repaid through a small percent of the merchant's future credit card sales. When a credit card sale is completed, an agreed upon percentage is automatically transferred to RapidAdvance until the contract obligation has been satisfied. By tying the repayments directly to a small portion of the merchant's future credit card receivables, the repayment is directly linked to the merchant's success: RapidAdvance gets paid when the merchant gets paid. Unlike a loan, merchant cash advances are unsecured, and have no business-use restrictions. Typically, 80% of applicants are approved, and once approved, funds generally reach the business owner's bank account within seven to 10 business days.

About RapidAdvance

RapidAdvance, based in Bethesda, Maryland, is a leading provider of merchant cash advances to small and mid-sized business owners looking to obtain additional working capital. Merchants use RapidAdvance's service to fund expansion, purchase equipment and inventory, pay off debt or leverage a seasonal opportunity. Funding is quick and easy and does not require the traditional guarantees, liens or collateral associated with bank loans.
